Góðan daginn Arnold

As I understand Hampiðjan got this area for use.

I think it is best for you to get in contact with Axel Överby or Smári Karlsson for future area for your operation.

Their department is overseeing the use of this land.

Bestu kveðjur

Hilmar

**Subject:** Future productions of salmon cages

Góðan daginn,

I am writing you regarding the future potential production of laxakvívar in Ísafjörður.

We, KJ, have in the past 3-4 years been coming to Ísafjörður to build laxakívar for Salmon farmers in the Westfjords.

Various production areas have been tested. From those experiences we have been thinking about what a good area would look like. From that we have made an example of a area that we think would be very well suited for this application.

The salmon industry is constantly moving forward, and equipment constantly needs to be built, rebuilt and refurbished. The demand for laxakívar is constantly growing. We, KJ, therefore present this proposal as a good potential site where we could produce cages.

I am of course not familiar with the future plans for this area, but hopefully this area is available in the future.

Vinarliga / Best regards
