Hello,

I am aware of the project to build a "viewpoint" platform at Flateyri.

I own the house at 15 Drafnargata.

I agree with the project, but would like the platform to be moved twenty meters towards the swimming pool building.

The access ramp will clearly overhang the back of our house, giving future visitors a more intrusive view of the interior.

During the winter, this will also ensure that the large volumes of snow continue to be cleared at this level by Ivar.

Subsidiary question: will this future seaside construction be storm-proof???

Thank you for your consideration.

Kveðja,

DEDEREN Philip
